Description (optional):

OMPO projects 206 and 304

Comment

I would ask that you strongly oppose any proposed projects such as 206 and 304 which will have a negative impact on the historic Oahu Railway and Land Company right-of-way, as well as the property of the Hawaiian Railway Society. I believe these historic resources offer Oahu residents and visitors from around the world an opportunity to learn and experience firsthand the impact that the railway had upon the culture and economy of the state of Hawaii. Preservation efforts such as those of the HRS are to be commended as projects worthy of community support for their efforts.

Sincerely,

Roger Colton
