206 & 304

Comment

Hello, my friend has long been a part of the Hawaiian Railway Society and over the years, I've been impressed and fascinated by his unending interest in trains. It is with sadness that I found out these two projects (206 & 304) may cause the HRS to shut down. I would greatly appreciate if you would reconsider approving these two projects, and give some consideration to the fantastic men and women who support the HRS. Thank you for your time.
