

TRANSPORTATION IMPROVEMENT PROGRAM

FEDERAL FISCAL YEARS 2022 – 2025

As of Revision #7

Approved by the OahuMPO Policy Board on July 26, 2022

This report was funded in part through grants from the Federal Highway Administration and Federal Transit Administration, U.S. Department of Transportation. The views and opinions of the agency expressed herein do not necessarily state or reflect those of the U.S. Department of Transportation.

Honolulu Authority for Rapid Transportation
1 Project: \$2,396,250

INTRODUCTION

The Oahu Metropolitan Planning Organization (OahuMPO) is the metropolitan planning organization for the island of Oahu. The OahuMPO is designated by the governor of the state to plan for, coordinate, and program the many transportation investments in the region. The Transportation Improvement Program (TIP) is a short-term program which lists all surface transportation projects on the island of Oahu that are eligible for Federal funding or that are regionally significant. The TIP covers a period of four years and contains two additional years for illustrative purposes. The TIP is updated every three years and revised at least twice a year.

The Hawaii Department of Transportation (HDOT), the City and County of Honolulu Department of Transportation Services (DTS), and the Honolulu Authority for Rapid Transportation (HART), all include projects within the TIP. The TIP identifies the highway, public transit, arterial and local street, pedestrian, and alternative transportation projects that will receive Federal transportation funds in the programmed Federal Fiscal Years (FFYs). All projects that involve Federal funds or are regionally significant must be reviewed and approved by the Oahu Metropolitan Planning Organization Policy Board.

Requirements:

- The TIP is required to be financially constrained by year, meaning that all projects can be implemented using committed, available, or reasonably available resources.
- The TIP must include a financial plan that demonstrates which projects can be implemented using current revenue sources and which projects are to be implemented using proposed revenue sources.
- All projects must be consistent with the Oahu Regional Transportation Plan (ORTP).
- All projects must be 'ready-to-go' in the year that they are programmed to be funded.
- All projects must have the matching local funds in place.
- All projects must meet at least one of the Fixing America's Surface Transportation Act (FAST Act) planning factors.

DEVELOPMENT PROCESS

The OahuMPO develops a new TIP every three years as detailed below.

Development of Financial Estimates

The OahuMPO, HDOT, DTS and HART cooperatively formulate estimates of Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) funds that are reasonably expected to be available for projects on the island of Oahu.

Call for Projects

The OahuMPO formally calls for projects from the implementing agencies. In response, the HDOT, DTS and HART submit projects to be considered for inclusion in the TIP. Since the current ORTP and TIP were updated in the same year, OahuMPO established a call for eligible projects simultaneously.

Project Prioritization and Selection

The OahuMPO created a project and program prioritization process to assist with project selection. The evaluation of the received projects and programs is done using measurable criteria based on the goals in the ORTP as it provides a quantitative method to compare projects and programs proposed for the TIP using the following process:

- Project and Program Consistency with the ORTP
- Project and Program Evaluation
- Project and Program Scoring Review by OahuMPO ORTP working group, TAC, CAC, and Policy Board

The entire project and program prioritization process is available in [Appendix A](#) with scoring for new projects and programs listed in [Appendix B](#).

Title VI and Environmental Justice (T6/EJ)

As part of the OahuMPO Title VI and Environmental Justice Program Implementation Plan, the OahuMPO ensures the following actions:

- Works with the entities to identify transportation projects that serve areas with low income and minority populations
- Provides an opportunity for all populations to give input into project identification

- Ensures there is no significant difference in planned investments between T6/EJ areas and non-T6/EJ areas which is available in [Appendix C](#)

Public Outreach

Public outreach efforts for the TIP are guided by the requirements and recommendations outlined in the OahuMPO Public Participation Plan. The public outreach process for the current TIP informally began with public outreach for the ORTP. The initial outreach occurred from January 2019 through May 2019 with in-person information and outreach booths, focus groups, and an online survey. These initial outreach methods were utilized to develop the vision and goals for the ORTP.

As a result of COVID-19, OahuMPO shifted outreach strategies to virtual methods including virtual open houses, virtual community meetings, and an online survey from October 2020 through March 2021. Virtual open houses provided an opportunity for the community to ask questions of the project agency sponsors and provide feedback on the proposed projects and programs in the ORTP. Seven community meetings were hosted by OahuMPO staff, project agency sponsors (HDOT, DTS, and HART), and Honolulu City Councilmembers. The strategies employed were used to collect feedback on the proposed projects and programs of the ORTP, which subsequently included an opportunity for the community to comment on the proposed TIP projects and programs. In total, 140 number of comments were received during the community meetings from 50 participants. Comments and questions from the community meetings were directed to the appropriate agency for response and were documented and provided in writing to the project agency sponsors and the Policy Board for consideration.

The OahuMPO also conducted three open houses specifically for the TIP, co-hosted with project agency sponsors in June 2021. The MPO scheduled these open house sessions to include a midday (12:00pm-1:30pm), evening (6:00pm-7:30pm), and weekend (10:00am-11:30am) option in efforts to provide the community ample opportunities to participate. A presentation about the purpose and importance of the TIP was shared by the OahuMPO. Participants were then given the opportunity to ask questions and provide comments about the proposed projects and programs. Notice of the open houses and opportunity to provide comments were distributed through the OahuMPO email list, a press release by the HDOT, the OahuMPO website, and the OahuMPO Facebook.

- OahuMPO email list: Three newsletter emails were sent to 501 subscribers publicizing the TIP public comment period and open houses.
- HDOT press release: An email was distributed to 2,044 recipients publicizing the TIP public comment period and open houses.
- OahuMPO website: TIP public comment period and open houses were shared on the website and calendar.

- OahuMPO Facebook: Information publicizing the TIP public comment period and open houses were posted nine times from May 27, 2021– June 14, 2021, which resulted in 202 views and 12 engagements.

Public and Intergovernmental Review (IGR)

The Public and IGR period was held from June 4, 2021 to June 22, 2021. The CAC, the public, mandated stakeholders, and federally required agencies were emailed and/or mailed notifications of the final draft TIP, how to provide comments, and a deadline to provide comments. The Public and IGR period was also promoted through the OahuMPO email list, a press release by HDOT and the OahuMPO Facebook. The TIP webpage also gave notice of the Public and IGR period, and provided the final draft TIP, an online map to visualize project locations, and information about how to provide comments. All comments received, as well as responses to the comments were provided to the Policy Board for their consideration when selecting projects for the final TIP. A total of 60 comments were received and the responses provided is available in [Appendix D](#) and on the OahuMPO website.

Committee and Policy Board Consideration

The final draft TIP must also be considered by both the CAC, comprised of representatives from neighborhood boards and organizations representing resident transportation needs and the TAC, comprised of representatives from transportation and government agencies. The Policy Board reviews their recommendations along with agency consultations, technical analyses, and public comments to decide whether to endorse the TIP.

TIP Approval

Following endorsement by the Policy Board, the TIP is then sent to the Governor's designee, currently the HDOT director for approval.

STIP Incorporation

Upon approval by the Policy Board and the Governor's designee, the TIP is incorporated, without change, as the Oahu element of the STIP.

FHWA AND FTA Approval

The TIP is jointly approved by FHWA and FTA as part of the STIP. The decision-making is dependent on the thoroughness and completion of the statewide transportation planning process used in developing the STIP, as required by federal code and regulation.

REVISIONS

The TIP is frequently revised to reflect changes in project delivery schedules, changes in cost estimates and/or in scope, and changes in management systems and administrative priorities. A revision refers to a change to the TIP that occurs between the triennial updates. A minor revision is an “administrative modification,” while a major revision is an “amendment.”

Pre-Approved Administrative Modifications:

Pre-approved administrative modifications are minor revisions that are considered pre-approved and can be immediately processed without prior review by the OahuMPO Committees and Policy Board. No solicitation of public comment or re-demonstration of financial constraint is required (23 CFR 450.104). However, it is assumed that financial constraint shall be re-established through the next TIP amendment process and the following must be true:

- The administrative modifications must not affect the financial constraint of the TIP.
- The administrative modifications must not result in the addition of another project (excluding the addition of projects in grouped listings or programs) and the funding amounts must stay within the guidelines defined in the TIP Policies and Procedures.
- The administrative modifications must not result in the deletion of project, including the deferral of a project to a year that is outside of the first four years of the TIP.
- The implementing agency for the project must concur with the actions.

Expedited Administrative Modifications:

Requests for expedited approval of administrative modifications are submitted directly to the Policy Board without prior review by the TAC or solicitation of public comment.

Amendments:

TIP amendments are submitted to the TAC, the Policy Board, and the Governor’s designee for action. Financial constraint is re-demonstrated and consistent with 23 CFR 450.220, the technical analyses are re-run, including the T6/EJ analysis, and the performance measure and Congestion Management Process (CMP) impacts are reassessed. Public comments are also solicited based on the procedures outlined in the OahuMPO Public Participation Plan, and the public comment period begins once the Amendment is posted on the OahuMPO website. Comments and the responses must be documented within the TIP Amendment document.

The TIP may be revised at any time if time permits. There are two planned revision cycles in each federal fiscal year as described in the table below.

Step	Description	First Revision (Fall/Winter)	Second Revision (Spring/Summer)
Step 1: Identify Revisions	Early coordination: Send DTS and HART official email that TIP revision requests are due in 3 months	August	January
	HDOT schedules Over-the-Shoulder-Reviews (OSRs) with HDOT, DTS, HART	October-November	March-April
	TIP revision requests due to OahuMPO	November	April
Step 2: Draft TIP Revision	OahuMPO develops and finalizes draft TIP revision	December	April-May
	HDOT, DTS, and HART review draft TIP revision	December	April-May
	OahuMPO reruns analyses, and prepares a fiscally constrained draft revision document for distribution	December	May
Step 3: Public and IGR Comments	Revisions posted to OahuMPO website and public and agency comment period begins	January	June
	Public comments and shared with the Committees and Policy Board	January	June
Step 4: Committee Consideration, Approval, and STIP incorporation	TAC consideration	February	July
	Policy Board Action	February-March	July
	OahuMPO sends letter to Governor's designee for approval of the TIP Amendment	March	July-August
	OahuMPO sends letter to HDOT requesting to incorporate TIP revision into the STIP	March	August
Step 5: Finalize	TIP/STIP Amendment jointly approved by FHWA and FTA	March	August
	OahuMPO website updated with date of revision approval and final revision document	March	August
	A full "As of revision #X" TIP document is created and uploaded to the OahuMPO website	March	August

REVISION HISTORY

The current FFY 2022-2025 TIP was endorsed by the Policy Board in July 2021. Since then, it has been revised 7 times through July 2022.

A summary is provided in the table below.

Revision #	Revision Type	Date	# Of Projects Modified	# Of Projects Removed	# Of Projects Added	Total # Of Projects Revised
1	Pre-Approved Modification	January 2022	37	0	0	37
2	Expedited Administrative Modification	February 2022	6	0	0	6
3	Amendment	February 2022	6	1	6	13
4	Pre-Approved Modification	May 2022	19	0	0	19
5	Expedited Administrative Modification	June 2022	1	0	0	1
6	Amendment	June 2022	3	1	4	8
7	Expedited Administrative Modification	July 2022	1	0	0	1
Total			73	2	10	85

FUNDING

Funding for all projects must be identified and can come from federal, state, and local funding sources. Descriptions for each funding source along with eligible uses, limitations, and availability is provided below.

FHWA funding sources:

Congestion Mitigation & Air Quality Improvement Program

The Congestion Mitigation and Air Quality (CMAQ) Improvement Program provides funding for transportation projects or programs that will contribute to attainment or maintenance of the national ambient air quality standards for ozone, carbon monoxide, and particulate matter. Since Oahu is an air quality attainment area, CMAQ funds provide a flexible funding source for transportation projects.

Highway Safety Improvement Program

The purpose of the Highway Safety Improvement Program (HSIP) is to reduce traffic fatalities and serious injuries on all public roads. The HSIP requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance. Projects must be consistent with the State's Strategic Highway Safety Program and must be identified on the basis of crash experience, potential, rate, and/or other data-driven means.

National Highway Performance Program (NHPP)

The NHPP provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in the State asset management plan for the NHS. Projects must be on an eligible facility and support progress toward achievement of national performance goals for improving infrastructure condition, safety, mobility, or freight movement on the NHS, and be consistent with Metropolitan and Statewide planning requirements. For Oahu this includes Interstate routes, freeways and specially designated "principal arterials".

Surface Transportation Block Grant Program (STBG)

This program provides flexible funding to best address State and local transportation needs. The STBG funds are meant to benefit minor arterial and collector roadways rather than the more critical principal arterials funded by the NHPP and other programs. The FHWA apportions funding as a lump sum for each State. That sum is then divided among apportioned programs. Part of the State's STBG apportionment is to be set aside for: Transportation Alternatives (TA), 2% for State Planning and Research, and bridges not on federal-aid highways ("Off-system bridges"). A State may also transfer up to 50% of the remaining STBG funds to the National Highway Performance Program, National Highway Freight Program, Highway Safety Improvement Program, and Congestion Mitigation and Air Quality Improvement Program. The STBG program has the most flexible eligibilities among all federal-aid highway programs. Funds can be used for a wide range of projects, such as for projects on any federal-aid highway, or for reconstruction, resurfacing, restoration, rehabilitation, or preservation of a bridge on any public road, roadway widening, roadway reconstruction, transit capital projects, public bus terminals and facilities, ridesharing projects, etc.

Transportation Alternatives

Transportation Alternatives (TA) is funded by set-aside Surface Transportation Block Grant program funding and are referred to as TA Set-Aside funds. The TA program provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, community improvements such as historic preservation, vegetation management, certain environmental mitigation, recreational trails, and safe routes to school projects. Similar to the STBG funds, a portion of TA funds are sub-allocated based on population. All projects interested in using TA Set-Aside funds must go through a competitive application process.

Recreational Trails Program

Part of the Transportation Alternatives funds is set aside for the Recreational Trails Program (RTP). The RTP is a state-administered, federal assistance program to develop and maintain recreational trails and trail-related facilities for both non-motorized and motorized recreational trail uses. Nationwide, federal transportation funds benefit recreational uses such as hiking, bicycling, in-line skating, equestrian use, cross-country skiing, snowmobiling, off-road motorcycling, all-terrain vehicle riding, four-wheel driving, or using other off-road motorized vehicles.

Off-System Bridges

The “Off-System” Bridge Program contains set-aside funds from the Surface Transportation Block Grant Program. The program provides funds to replace or rehabilitate deficient bridges that are not on the federal-aid road system, therefore bridges on local roads or rural minor collectors.

Discretionary

Discretionary funds are additional funds (not formula funds) that the federal government may decide to award to the region. Examples include Corridor Planning, Ferry Boats, System Preservation funding; Public Lands Highways funding; and congressional allocations such as RAISE/BUILD grants.

FTA funding sources:

§5307 Urbanized Area Formula Grants

The Urbanized Area Formula Funding program (49 U.S.C. 5307) makes federal resources available to urbanized areas and to governors for transit capital and operating assistance in urbanized areas and for transportation-related planning. An urbanized area is an incorporated area with a population of 50,000 or more that is designated as such by the U.S. Department of Commerce, Bureau of the Census.

§5340 Growing States and High-Density States Formula Program

The Growing States and High-Density States Formula Program (49 U.S.C. 5340) was established by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) to apportion additional funds to the Urbanized Area Formula and Rural Area Formula programs. Recipients of funds are existing Urbanized Area (Section 5307) and Rural Area (Section 5311) formula fund recipients.

§5309 Capital Investment Grants

This FTA discretionary grant program funds transit capital investments, including heavy rail, commuter rail, light rail, streetcars, and bus rapid transit. Federal transit law requires transit agencies seeking Capital Investment Grant funding to complete a series of steps

over several years. For New Starts and Core Capacity projects, the law requires completion of two phases in advance of receipt of a construction grant agreement – Project Development and Engineering.

For Small Starts projects, the law requires completion of one phase in advance of receipt of a construction grant agreement – Project Development. The law also requires projects to be rated by FTA at various points in the process according to statutory criteria evaluating project justification and local financial commitment.

§5310 Enhanced Mobility of Seniors & Individuals with Disabilities

This program (49 U.S.C. 5310) provides formula funding to states for the purpose of assisting private nonprofit groups in meeting the transportation needs of older adults and people with disabilities when the transportation service provided is unavailable, insufficient, or inappropriate to meeting these needs. Funds are apportioned based on each state's share of the population for these two groups. Formula funds are apportioned to direct recipients; for rural and small urban areas, this is the state Department of Transportation, while in large urban areas, a designated recipient is chosen by the governor. Direct recipients have flexibility in how they select subrecipient projects for funding, but their decision process must be clearly noted in a state/program management plan. The selection process may be formula-based, competitive or discretionary, and subrecipients can include states or local government authorities, private non-profit organizations, and/or operators of public transportation.

The program aims to improve mobility for seniors and individuals with disabilities by removing barriers to transportation service and expanding transportation mobility options. This program supports transportation services planned, designed, and carried out to meet the special transportation needs of seniors and individuals with disabilities in all areas – large urbanized (over 200,000), small urbanized (50,000–200,000), and rural (under 50,000). Eligible projects include both “traditional” capital investment and “nontraditional” investment beyond the Americans with Disabilities Act (ADA) complementary paratransit services.

§5329 Public Transportation Safety and Oversight

This section requires FTA to implement and maintain a national public transportation safety program to improve the safety of all public transportation systems that receive federal funding. The safety program includes a national public transportation safety

plan, a safety certification training program, a public transportation agency safety plan, and a state safety oversight program. Under the FAST Act, section 5329 provides for a temporary Federal assumption of rail transit safety oversight, under certain circumstances. This section also authorizes FTA to issue restrictions and prohibitions to address unsafe conditions or practices, and to withhold funds for non-compliance with safety requirements.

§5337 State of Good Repair Grants

The State of Good Repair Grants Program (49 U.S.C. 5337) provides capital assistance for maintenance, replacement, and rehabilitation projects of high-intensity fixed guideway and bus systems to help transit agencies maintain assets in a state of good repair. Additionally, SGR grants are eligible for developing and implementing Transit Asset Management plans.

§5339 Buses and Bus Facilities Formula Program

Provides funding to states and transit agencies through a statutory formula to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities. In addition to the formula allocation, the Grants for Buses and Bus Facilities program (49 U.S.C. 5339) includes two discretionary components: the Bus and Bus Facilities Discretionary Program and the Low or No Emissions Bus Discretionary Program.

Local Funding Sources:

State of Hawaii

The State of Hawaii imposes taxes, fees, and charges relating to the operation and use of motor vehicles on public highways which are deposited in the State Highway Fund section of the State Special Funds and are used for acquisition, planning, design, construction, repair, and maintenance of the State Highway System.

Every other year, the Governor submits to the State Legislature the Administration's biennium budget. The Legislature reviews the biennium budget in detail and authorizes all or a portion of the biennium budget and the individual capital improvement projects.

Authorization of the operating and capital improvement budgets by the Legislature, as part of the biennium budget, includes the appropriation of monies from designated sources. These appropriations authorize the funding for the local match for the State federal-aid projects in the TIP.

City and County of Honolulu

The City funding comes primarily from the Highway Fund (not to be confused with the State Highway Fund) and the Public Transportation System. The Highway Fund includes special revenue proceeds relating to the City fuel tax, motor vehicle weight tax, and public utility franchise tax which are earmarked by law for highway and related activities. Funding from the Public Transportation System include

charges services, operating grants/contributions, Highway Fund, and General Fund. Funding for HART include charges for services, capital grants/contributions, investment earnings, and intergovernmental transfers such as the General Excise Tax (GET).

Where local funding is identified in the TIP for City projects, funds from existing revenue sources are programmed. While it is anticipated that local funding will be available at the levels programmed in this document, enactment of the City annual budget ordinances is still required.

HART

HART is responsible for building the commuter rail system for the City and County of Honolulu. The local share of project costs is currently funded through a dedicated half percent surcharge on the State GET and a one percent surcharge on the Transient Accommodation Tax (TAX) until 2030.

FINANCIAL CONSTRAINT

The TIP is required to be financially constrained by each program year and include sufficient financial information for demonstrating that projects can be implemented using committed, available, or reasonably available revenue sources, with reasonable assurance that the federally supported transportation system is being adequately operated and maintained (23 CFR 450.326).

The tables below show a summary by funding source for each program year based by the type of federal funding.

FHWA Funded Projects: Hawaii Department of Transportation

CONGESTION MANAGEMENT

As part of the transportation planning process, the OahuMPO is required to maintain a Congestion Management Process (CMP) which is a systematic and regionally accepted approach for managing congestion that provides accurate and up-to-date information on transportation system performance (23 CFR 450.322). The purpose of the CMP is to comprehensively consider possible strategies, evaluate projects from diverse viewpoints, and meaningfully involve key stakeholders to support strategic regional choices in congestion management, such as improving roadways, expanding transit capacity, encouraging bicycling, and ensuring safe walking environments.

The criteria used by OahuMPO to evaluate and select TIP projects include several measures that are linked to the CMP. The CMP can be directly linked to eight of the fourteen TIP project and program evaluation criteria. The eight evaluation criteria and their respective ORTP goals are as follows:

- Goal 1: Improve the safety of the transportation system
 - Evaluation Criteria 1.1.1: Increase safety by investing in safety improvements in high crash areas and projects and programs that intend on improving safety
- Goal 2: Support active and public transportation
 - Evaluation Criteria 2.1.1: Increase the share of people using active transportation by investing in projects and programs that add miles of pedestrian facilities or improve existing pedestrian facilities
 - Evaluation Criteria 2.1.2: Increase the share of people using active transportation by investing in projects and programs that add miles of bicycle facilities or improve existing bicycle facilities
 - Evaluation Criteria 2.2.1: Increase the share of people taking transit by investing in projects and programs that support TheBus, Handi-Van, and Rail
 - Evaluation Criteria 2.3.1: Decrease the share of people driving alone by investing in projects and programs that encourage people not to drive alone
- Goal 6: Support a reliable and efficient transportation system

- Evaluation Criteria 6.1.1: Improve freight reliability by investing in projects on designated freight routes and programs that intend on improving freight reliability
- Evaluation Criteria 6.1.2: Improve reliability of Interstate and Non-Interstate highways, freight networks, and transit by investing in projects and programs with the intent of reducing and/or managing non-recurring congestion and transit delays
- Evaluation Criteria 6.2.1: Improve efficiency by investing in projects on congested corridors, and corridors with high numbers of transit trips per hour, projects that improve the efficiency of transit, and programs that intend on improving the efficiency of the transportation system

More information about the Congestion Management Process is available in the OahuMPO [CMP Report](#).

The following table list the projects and programs that are expected to mitigate congestion.

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC1	Alapai Transportation Management Center Operations	Operations and management for the joint communications center behind the Alapai Transit Center which holds City, State & emergency response agencies.	\$1,139
OC10	Traffic Signals at Various Locations	Install and upgrade traffic signals island wide including ADA improvements, signs and markings, and interties.	\$11,879
OC13	Bus and Handi-Van Acquisition Program	Purchase replacement transit buses and Handi-Van vehicles.	\$98,199
OC14	Bus Stop ADA Access and Site Improvements	Modify bus stops to comply with the Americans with Disabilities Act (ADA). Improve the mobility independence for transit users of all ages and abilities, pedestrian access, and the number of ADA accessible bus stops.	\$2,583
OC16	Honolulu Rail Transit Project	Plan, design, and construct a fixed guideway system between East Kapolei and Ala Moana Center. The system includes stations and related appurtenances, park-and-ride facilities, a maintenance and storage facility, light metro vehicles, and associated core systems.	\$2,396,250
OC2	Bikeway Improvements Program	This is an ongoing island wide program for the implementation of the Oahu Bicycle Master Plan improvements, the development of new projects, and the upgrade of existing bicycle projects.	\$818
OC-21-54	Kalaeloa Boulevard Railroad Improvements	Design and install a Railroad traffic signal (and traffic camera) located at Kalaeloa Boulevard and Railroad Crossing.	\$805

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC-21-55	Oahu Traffic Signal Controller Modernization, Phase 2	To construct and inspect related equipment for approximately 150 traffic signalized intersections	\$10,696
OC-21-59	Intermodal Connectivity TA Set-Aside (OahuMPO)	This program encompasses projects that have been awarded OahuMPO Transportation Set-Aside funds (TA Set-Aside) and have been flexed from FHWA to FTA. The TA Set-Aside is a competitive grant program that provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, and community improvement activities. Locations to be determined by the OahuMPO TA Project Evaluation and Ranking process.	\$41,892
OC23	Salt Lake Boulevard Widening, Phase 3B	To widen the Salt Lake Boulevard to a multi-lane roadway within the existing 100' right-of-way between Maluna and Ala Liliko'i Streets.	\$32,050
OC25	Transportation Alternatives Set-Aside Program (MPO) at Various Locations	The Transportation Alternatives Set-Aside Program (TA Set-Aside) is a competitive grant program that provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, and community improvement activities. Locations to be determined by the OahuMPO TAP Project Evaluation and Ranking process. HART projects may be flexed from FHWA to FTA. The Ala Wai Bridge project is a new pedestrian and bicycle bridge crossing the Ala Wai Canal in the University Ave/Kalaimoku Street alignment.	\$29,067
OC26	Transportation Alternative Program (State)	The Transportation Alternatives Program (TAP) is a competitive grant program that provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, and community improvement activities. Locations to be determined by the State TAP Project Evaluation and Ranking process. HART projects may be flexed from FHWA to FTA. The Haleiwa Road Multi-Use Path Project will include design, construction, and inspection of improvements, including a multi-use path along Haleiwa Road between Waialua Beach Road and Kamehameha Highway	\$1,892
OC4	Computerized Traffic Control System	Upgrade and expand fiber optic lines, CCTV cameras, data collection, and signal control in urban and rural areas for connection to the Traffic Control Center.	\$1,086
OC8	Traffic Improvements at Various Locations	Provide traffic congestion relief and improve traffic safety at various locations, including but not limited to Mahoe/Waipahu Streets and Manager's Drive/Hiapo Street Intersection.	\$7,919
OS11	ITS Operation and Maintenance	Annual costs to operate and maintain the ongoing and existing ITS program. This includes costs for the operation and maintenance of CCTVs and vehicle detection equipment. This also includes costs for telecommunication and server hosting services.	\$2,000

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OS12	Destination Sign, Upgrade and Replacement	Replace and/or upgrade the existing destination signs and sign support structures on Interstate Routes H-1, H-2, H-201, and Pali Highway.	\$35,289
OS17	Interstate Route H-1, Kapolei Interchange Complex, Phase 3	Phase 3 scope of work is widening Farrington Highway, enlarging the H-1 Freeway loop off-ramp to Kalaeloa Blvd, construct the Mauka Frontage Road from Makakilo Drive to Kapolei Interchange, and construct the Palailai Interchange.	\$47,000
OS-21-44	Pali Highway, Rockfall Mitigation, Vicinity of MP 6.10 to MP 6.55	Rockfall protection/mitigation to be determined following an EA.	\$1,695
OS-21-45	Pali Highway, Rockfall Mitigation, Vicinity of MP 5.90 to MP 6.10	Rockfall protection/mitigation to be determined following an EA.	\$635
OS-21-46	Interstate Route H-1, Kunia Interchange Improvements	Improve capacity and congestion at Kunia Interchange due to the following issues: 1. Bottlenecks at high volume ramps due to merging or diverging of traffic from the mainline to/from the interchange ramp; and 2. A heavy mauka bound right turn movement to the eastbound H-1 on-ramp, as well as a heavy makai bound left-turn movement to the H-1 eastbound on-ramp. Improvements could include widening Ft. Weaver Road between S. Kapuna Loop and Farrington Highway and/or adding/adjusting ramps in the Kunia IC.	\$15,500
OS-21-49	Harbor Access Road (Route 94)	Scope could include but is not limited to the design and construction of new 4 lane divided concrete roadway, auxiliary lanes, sidewalks, bike lanes, traffic signals, intersections, associated utilities, grading, landscaping, and connections to future City roadways and drainage canal bridge crossing.	\$7,000
OS-21-53	Farrington Highway Widening, Helelua to Mohihi	A 5th lane will be installed on Farrington Highway, from Helelua Street to Mohihi Street. The lane will be used as a turnout lane and as a contraflow lane during peak travel times. Includes reconstructing the roadway and installing signs, striping and pavement markings.	\$32,000
OS-22-60	Adaptive Traffic Signal Control Technology & Traffic Signal Controller Installation at Various Locations, Oahu	The project will install, operate, and maintain new controllers at 268 traffic signal locations on Oahu and implement adaptive traffic control systems (ATCS) at various locations on Oahu. ATCS are a potential method of dealing with congestion, which adjusts signal timing to accommodate changing traffic patterns. Work may include providing and installing hardware, software, vehicle detection, and staff training.	\$41,000
OS-22-62	Farrington Highway (RTE 93) Sidewalk Improvements, Hakimo Rd to Nanakuli Ave, MP 6.89 to MP 5.06	Construct new PCC sidewalk and ramps, drainage facilities, utility relocations and adjustments, driveway adjustments, grade adjustment walls, modifications/adjustments to existing traffic appurtenances (signs, traffic signals, etc.)	\$15,300
OS43	Leeward Bikeway, Philippine Sea Road to Waipahu Depot Street	Improve the bikeway/bike path from Philippine Sea Road to Waipahu Depot Street.	\$0

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OS5	Freeway Management System, Interstate H-1, H-2, and Moanalua Freeway (Routes H-201 and 78)	<p>The project consists of the installation of closed-circuit television (CCTV) cameras, vehicle detectors, cabinets, and communication equipment on the Interstate H-1, H-2, and Moanalua Freeway. Minor interior modifications of the Interstate Route H-3 Control Center will also be done to accommodate system improvements. This project will be implemented in phases.</p> <p>The Freeway Management System's System Manager will assist the State with managing and guiding the Intelligent Transportation System (ITS) program. This includes software development, equipment procurement assistance, acceptance testing, performance monitoring, and strategic planning.</p>	\$24,712
OS50	Transportation Assistance for Elderly and Disabled	Funds from the program will be utilized for the purchase of buses for paratransit services for seniors and individuals with disabilities.	\$2,490
OS57	Freeway Management System, Joint Traffic Management Center Operations (State)	These funds will be required for the State share of the annual operating expenses for the JTMC which includes normal building operations and a JTMC Manager. The State share has been calculated based on methodology that involves the estimated square footage that the State will occupy.	\$1,400
OS61	Kamehameha Highway (Route 83) Realignment, Vicinity of Kailua Beach	Realign a portion of Kamehameha Highway, on the North Shore. The project proposes to construct a realignment of Kamehameha Highway, from Haleiwa to the vicinity of Waimea Bay to address safety issues that revolve around use of the beach.	\$1,020
OS63	Traffic Counting Stations at Various Locations, Oahu	Construction of traffic counting stations for traffic data gathering and planning purposes. There is a separate phase shown for the rest of the islands in Statewide section of the STIP. This is a part of phase 2 of the Statewide project. The project will collect required Highway Performance Monitoring System (HPMS) data.	\$2,809
OS67	Interstate Route H-1, Reconstruction and Repair, Eastbound, Waimalu Interchange to Halawa	Rehabilitate or reconstruct Portland concrete pavement. Widen to improve shoulders and travel way.	\$0
OS75	Kamehameha Highway (Route 83), Rockfall Protection, Waimea Bay	Construct various rockfall/slope protection and slope stabilization mitigation measures.	\$29,326
OS79	Shoreline Protection/Mitigation Program	Develop and construct shoreline protection measures to better protect roadways from flooding and erosion as identified and prioritized in the Statewide Shoreline Protection Program. This funding is for the Oahu District Sub-Program.	\$49,660
OS80	Traffic signal Modernization at Various Locations, Ph2	Upgrade signal equipment to improve programming and optimization, to help improve traffic flow, reduce congestion, and prevent failures & downtime. Upgrades include replace old/damaged signal poles, underground conduits & wiring, signal controllers, and other equipment. Address five high priority intersections.	\$5,000

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OS82	Interstate Route H-1 Improvements, Eastbound, Ola Lane Overpass to Vineyard Boulevard	Eastbound Operational/congestion improvements, and structural improvements to bridges within the limits.	\$65,000
OS84	Kamehameha Highway (Route 83) Intersection Improvements at Kahekili Highway	Modify existing intersection and roadway approaches to a roundabout configuration. Improvement also includes a drainage system, curb and gutter, sidewalks, pavement markings and signing.	\$5,900
OS9	Freeway Service Patrol	Operate roving service patrols along the Interstate H-1, Moanalua Freeway, and Interstate H-2. Services include towing of disabled vehicles; removing debris; providing basic fire extinguisher use; deploying traffic control devices; assisting the Honolulu Police Department, Honolulu Fire Department, and Emergency Medical Services at crash scenes and other incidents; assisting sick or injured motorists with basic first aid; and notifying 911 of incidents.	\$16,000
Total			\$3,037,011

PERFORMANCE MANAGEMENT

23 CFR 450.306 requires the OahuMPO in cooperation with HDOT and DTS, the public transportation operator on Oahu to develop a performance-driven, outcome-based approach to support the national goals described in 23 U.S.C. 150(b) and 49 U.S.C. 5301(c).

The OahuMPO shall establish performance targets that address the performance measures or standards established under 23 CFR part 490 (where applicable), 49 U.S.C. 5326(c), and 49 U.S.C. 5329(d) to use in tracking progress toward attainment of critical outcomes for the region of the OahuMPO.

The selection of targets that address performance measures described in 23 U.S.C. 150(c) shall be in accordance with the appropriate target setting framework established at 23 CFR part 490 and shall be coordinated with HDOT to ensure consistency, to the maximum extent practicable.

The selection of performance targets that address performance measures described in 49 U.S.C. 5326(c) and 49 U.S.C. 5329(d) shall be coordinated, to the maximum extent practicable, with DTS, the public transportation provider on Oahu to ensure consistency with the performance targets that public transportation providers establish under 49 U.S.C. 5326(c) and 49 U.S.C. 5329(d).

The OahuMPO shall establish the performance targets not later than 180 days after the date on which HDOT or DTS, the public transportation operator on Oahu establishes their performance targets.

A measure is defined as a metric that is used to establish targets and to assess progress toward achieving the established targets and a target is a value for the measure, to be achieved within an identifiable time period. The OahuMPO is required to set performance targets and report on the progress made toward achieving each target in the following areas:

- Highway Safety
- Pavement and Bridge Condition
- System Performance
- Transit Safety and Transit Asset Management

The criteria used by OahuMPO to evaluate and select TIP projects include several measures that are linked to these performance targets as described in the project and program prioritization process in [Appendix A](#). The performance targets can be directly linked to nine of the fourteen TIP project and program evaluation criteria. The nine evaluation criteria and their respective ORTP goals are as follows:

- Goal 1: Improve the safety of the transportation system
 - Evaluation Criteria 1.1.1: Increase safety by investing in safety improvements in high crash areas and projects and programs that intend on improving safety
- Goal 2: Support active and public transportation
 - Evaluation Criteria 2.1.1: Increase the share of people using active transportation by investing in projects and programs that add miles of pedestrian facilities or improve existing pedestrian facilities
 - Evaluation Criteria 2.1.2: Increase the share of people using active transportation by investing in projects and programs that add miles of bicycle facilities or improve existing bicycle facilities
 - Evaluation Criteria 2.2.1: Increase the share of people taking transit by investing in projects and programs that support TheBus, Handi-Van, and Rail
 - Evaluation Criteria 2.3.1: Decrease the share of people driving alone by investing in projects and programs that encourage people not to drive alone
- Goal 3: Promote an equitable transportation system
 - Evaluation Criteria 6.1.1: Improve freight reliability by investing in projects on designated freight routes and programs that intend on improving freight reliability
- Goal 6: Support a reliable and efficient transportation system
 - Evaluation Criteria 3.1.1: Increase pedestrian, bicycle, and transit options for mobility constrained populations by investing in pedestrian, bicycle, and transit projects and programs that serve those populations
 - Evaluation Criteria 6.1.2: Improve reliability of Interstate and Non-Interstate highways, freight networks, and transit by investing in projects and programs with the intent of reducing and/or managing non-recurring congestion and transit delays

- Evaluation Criteria 6.2.1: Improve efficiency by investing in projects on congested corridors, and corridors with high numbers of transit trips per hour, projects that improve the efficiency of transit, and programs that intend on improving the efficiency of the transportation system

Highway Safety Targets

23 CFR 490 Subpart B requires the OahuMPO and HDOT to establish and report their safety targets, and the process that FHWA will use to assess whether HDOT has met or made significant progress toward meeting their safety targets. The OahuMPO in coordination with HDOT is required to set annual targets for the following five safety-related performance measures based on a 5-year rolling average:

- Number of fatalities
- Rate of fatalities per 100 million Vehicle Miles Traveled (VMT)
- Number of serious injuries
- Rate of Serious Injuries per 100 million VMT
- Number of non-motorized fatalities and non-motorized serious injuries (combined)

In January 2022, the OahuMPO Policy Board approved the following safety performance targets:

Performance Measure	2022-2025 4-year Target
Number of Fatalities	52.5 / year
Rate of fatalities per 100 million VMT	0.885
Number of serious injuries	255.0 / year
Rate of Serious Injuries per 100 million VMT	4.312
Number of non-motorized fatalities and non-motorized serious injuries	90.0 / year

The following table list the projects and programs that are expected to help achieve the highway safety targets.

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC10	Traffic Signals at Various Locations	Install and upgrade traffic signals island wide including ADA improvements, signs and markings, and interties.	\$11,879

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC2	Bikeway Improvements Program	This is an ongoing island wide program for the implementation of the Oahu Bicycle Master Plan improvements, the development of new projects, and the upgrade of existing bicycle projects.	\$818
OC-21-54	Kalaeloa Boulevard Railroad Improvements	Design and install a Railroad traffic signal (and traffic camera) located at Kalaeloa Boulevard and Railroad Crossing.	\$805
OC25	Transportation Alternatives Set-Aside Program (MPO) at Various Locations	The Transportation Alternatives Set-Aside Program (TA Set-Aside) is a competitive grant program that provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, and community improvement activities. Locations to be determined by the OahuMPO TAP Project Evaluation and Ranking process. HART projects may be flexed from FHWA to FTA. The Ala Wai Bridge project is a new pedestrian and bicycle bridge crossing the Ala Wai Canal in the University Ave/Kalaimoku Street alignment.	\$29,067
OC26	Transportation Alternative Program (State)	The Transportation Alternatives Program (TAP) is a competitive grant program that provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, and community improvement activities. Locations to be determined by the State TAP Project Evaluation and Ranking process. HART projects may be flexed from FHWA to FTA. The Haleiwa Road Multi-Use Path Project will include design, construction, and inspection of improvements, including a multi-use path along Haleiwa Road between Waiialua Beach Road and Kamehameha Highway	\$1,892
OC8	Traffic Improvements at Various Locations	Provide traffic congestion relief and improve traffic safety at various locations, including but not limited to Mahoe/Waipahu Streets and Manager's Drive/Hiapo Street Intersection.	\$7,919
OS10	Guardrail and Shoulder Improvements, Various Locations	Install and upgrade guardrails to bridge end post connections, bridge railing, guardrail end terminals, crash attenuators, miscellaneous drainage, and other appurtenant improvements.	\$4,700
OS14	Interstate Route H-1, Guardrail and Shoulder Improvements, Kapiolani Interchange to Ainakoa Avenue, Phase 2	Install and/or upgrade existing guardrails, crash cushions, and concrete barriers to meet current standards. Upgrade lighting. On Westbound Kalaniana'ole Highway, just before the Ainakoa Intersection, the shoulder and bike lane taper off until it disappears at Ainakoa. To the west on H-1, and on the off-ramp to below the viaduct towards Kahala Mall, a shoulder and bike lane reappears. The project will close that gap in the bike lane, by taking space from the median on H-1.	\$6,120
OS20	Interstate Route H-1 Safety Improvements, Beginning of H-1 (Palailai Interchange) to Waiawa Overpass	Scope includes but is not limited to: Installation of milled rumble strips on shoulders; reconstruction of paved shoulders; pavement markings; and signing.	\$0
OS-21-44	Pali Highway, Rockfall Mitigation, Vicinity of MP 6.10 to MP 6.55	Rockfall protection/mitigation to be determined following an EA.	\$1,695

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OS-21-47	Interstate Route H-1 Highway Lighting Improvements, Kaimakani Overpass to Gulick Avenue	Installation of new highway lighting system consist of new light poles and conduits, LED fixtures, trenching for conduits, conducts, foundations/barriers, power equipment, erosion control, and traffic control.	\$30,000
OS-21-53	Farrington Highway Widening, Helelua to Mohihi	A 5th lane will be installed on Farrington Highway, from Helelua Street to Mohihi Street. The lane will be used as a turnout lane and as a contraflow lane during peak travel times. Includes reconstructing the roadway and installing signs, striping and pavement markings.	\$32,000
OS-21-57	Fort Barrette Road Railroad Crossing Improvements	The project includes upgrading the existing railroad crossing from asphalt to concrete, replacing the existing wooden tracks and ties, and installing new automated crossing gates and signals which will be synced with the new traffic signal at Roosevelt Avenue.	\$2,300
OS-22-58	High Friction Surface Treatment on Highway Ramps, Oahu	Installation of high friction surface treatments on 8 ramps at various locations on Oahu.	\$2,200
OS-22-62	Farrington Highway (RTE 93) Sidewalk Improvements, Hakimo Rd to Nanakuli Ave, MP 6.89 to MP 5.06	Construct new PCC sidewalk and ramps, drainage facilities, utility relocations and adjustments, driveway adjustments, grade adjustment walls, modifications/adjustments to existing traffic appurtenances (signs, traffic signals, etc.)	\$15,300
OS-22-64	Whitmore Ave (RTE 7012) Sidewalk Improvements, Phase 2, Ihihi Ave to Whitmore Community Center, MP 0.72 to MP 1.04	Construct new PCC sidewalk and ramps, drainage facilities, utility relocations and adjustments, driveway adjustments.	\$2,800
OS44	Moanalua Freeway (Route 78) and Interstate Route H-2, Guardrail and Shoulder Improvements, Phase 2	Install and/or upgrade the existing guardrails. Reconstruct and pave road shoulders.	\$0
OS45	Moanalua Freeway (route H-201), Highway Lighting Improvements, Halawa Heights Off-Ramp to Middle Street Overpass	Upgrade/replace existing freeway lighting on Moanalua Freeway, from the Halawa Heights westbound off-ramp (milepost 1.12) to the Moanalua/H-1 Freeway merge at Middle Street (milepost 4.09).	\$0
OS46	Moanalua Freeway (Route H-201), Highway Lighting Improvements, MP 0 to MP 0.73 (Halawa to H-3 Freeway Overpass)	Installation of new highway lighting system consist of new light poles and conduits, LED fixtures, trenching for conduits, conducts, foundations/barriers, power equipment, erosion control, and traffic control.	\$0
OS69	Farrington Highway (Route 93), Safety Improvements, H-1 Freeway to Pohakunui Avenue	Scope includes, but is not limited to, the installation of milled rumble strips or rumble edge stripes on shoulders/median; installation of milled rumble strips on centerline; widening shoulders where possible; installation of speed feedback sign; installation of concrete median barrier at U-turn; and installation of pavement markings and signage.	\$7,000

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OS73	Likelike Highway (Route 63), Rehabilitation and Safety Improvements, Emmeline Place to Kahekili Highway	Includes, but is not limited to the installation of milled rumble strips or rumble edge stripes on shoulders where possible, high friction surface treatment, speed feedback sign, guardrail end treatment, in-lane pavement markers, LED speed limit signs and chevrons, widen paved shoulders where possible, pavement markings, and signing.	\$24,000
OS84	Kamehameha Highway (Route 83) Intersection Improvements at Kahekili Highway	Modify existing intersection and roadway approaches to a roundabout configuration. Improvement also includes a drainage system, curb and gutter, sidewalks, pavement markings and signing.	\$5,900
OS9	Freeway Service Patrol	Operate roving service patrols along the Interstate H-1, Moanalua Freeway, and Interstate H-2. Services include towing of disabled vehicles; removing debris; providing basic fire extinguisher use; deploying traffic control devices; assisting the Honolulu Police Department, Honolulu Fire Department, and Emergency Medical Services at crash scenes and other incidents; assisting sick or injured motorists with basic first aid; and notifying 911 of incidents.	\$16,000
Total			\$202,395

Pavement and Bridge Condition Targets

23 CFR 490 Subparts C & D requires the OahuMPO in coordination with HDOT to establish measures to assess the condition of pavements on the Interstate System, pavements on the National Highway System (NHS), and bridges carrying the NHS which include on- and off-ramps connected to the NHS. The pavement and bridge performance measures, collectively referred to as PM-2 measures, include the following six measures:

- % of Interstate pavements in good condition
- % of Interstate pavements in poor condition
- % of Non-Interstate NHS pavements in good condition
- % of Non -Interstate NHS pavements in poor condition
- % of NHS bridges classified in good condition
- % of NHS bridges classified in poor condition

In November 2018, the OahuMPO Policy Board approved the following pavement and bridge condition targets:

Performance Measure	2018-2020 2-year Target	2018-2022 4-year Target
% of Interstate pavements in good condition	7%	7%
% of Interstate pavements in poor condition	4%	4%
% of Non-Interstate NHS pavements in good condition	15%	15%
% of Non-Interstate NHS pavements in poor condition	4%	4%
% of NHS bridges classified in good condition	20%	20%
% of NHS bridges classified in poor condition	2%	2%

The following table list the projects and programs that are expected to help achieve the pavement condition targets.

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OS1	Bridge and Pavement Improvement Program, Oahu	This is an ongoing island wide program for the system maintenance of highway bridges and pavement. Work may include bridge and/or pavement reconstruction, resurfacing, restoration, rehabilitation, and/or preservation.	\$84,000
OS26	Kalanianaʻole Highway (Route 72) Resurfacing, Poalima Street to Vicinity of Makai Pier	Roadway resurfacing of Kalanianaʻole Highway from Poalima Street to Vicinity of Makai Pier.	\$0
OS62	Pali Highway (Route 61) Resurfacing & Lighting Improvements, Vineyard Blvd (Route 98) Kamehameha Highway (Route 83)	Scope of work includes but is not limited to cold planning, resurfacing, reconstruction of weakened pavement, installation of new highway lighting, construction of concrete median barriers, replacement of guardrails in-kind and end treatments, installation of new guardrails, installing bridge rails, and installation of signs and pavement markings.	\$0
OS67	Interstate Route H-1, Reconstruction and Repair, Eastbound, Waimalu Interchange to Halawa	Rehabilitate or reconstruct Portland concrete pavement. Widen to improve shoulders and travel way.	\$0
OS79	Shoreline Protection/Mitigation Program	Develop and construct shoreline protection measures to better protect roadways from flooding and erosion as identified and prioritized in the Statewide Shoreline Protection Program. This funding is for the Oahu District Sub-Program.	\$49,660
Total			\$133,660

The following table list the projects and programs that are expected to help achieve the bridge condition targets.

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC3	Bridge Inspection, Inventory, and Appraisal	Inventory, inspect, and appraise City bridges, including underwater inspection and scour survey.	\$11,213
OS1	Bridge and Pavement Improvement Program, Oahu	This is an ongoing island wide program for the system maintenance of highway bridges and pavement. Work may include bridge and/or pavement reconstruction, resurfacing, restoration, rehabilitation, and/or preservation.	\$84,000
OS-21-43	Kamehameha Highway (Route 99) Seismic Retrofit, Pearl Harbor Interchange, Structure #2	All bridges identified to be potentially vulnerable to earthquake damage/collapse need to be analyzed and designed for retrofitting strategies to prevent their collapse during a credible earthquake. The type and scope of the retrofit work can only be determined through the analysis.	\$1,180
OS-21-51	Moanalua Freeway, (Interstate Route H-201) Seismic Retrofit, Puuloa Interchange (Five Structures)	All bridges identified to be potentially vulnerable to earthquake damage/collapse need to be analyzed and designed for retrofitting strategies to prevent their collapse during a credible earthquake. The type and scope of the retrofit work can only be determined through the analysis.	\$2,500
OS-21-52	Likelike Highway (Route 63) Seismic Retrofit, Kalihi Stream Bridges	All bridges identified to be potentially vulnerable to earthquake damage/collapse need to be analyzed and designed for retrofitting strategies to prevent their collapse during a credible earthquake. The type and scope of the retrofit work can only be determined through the analysis.	\$710
OS-22-61	Farrington Highway (Route 93) Bridge Rehabilitation, Ulehawa Stream Bridge	Rehabilitate the existing bridge	\$22,000
OS28	Kamehameha Highway (Route 83), Bridge Replacement, Kaipapau Stream Bridge	Replace the existing bridge on Kamehameha Highway.	\$0
OS29	Kamehameha Highway (Route 83), Bridge Replacement, Kaluanui Stream Bridge	Replace the existing bridge on Kamehameha Highway.	\$18,360
OS31	Kamehameha Highway (Route 83), Bridge Replacement, Laieloa Stream Bridge	Replace the existing concrete slab bridge on Kamehameha Highway in the vicinity of Laie.	\$14,980
OS34	Kamehameha Highway (Route 83), Bridge Replacement, Waiahole Stream Bridge	Replace the existing concrete structure on Kamehameha Highway. Bicycle and pedestrian facilities will be included when feasible.	\$16,422
OS36	Kamehameha Highway (Route 83), Bridge Replacement, Waipilopilo Stream Bridge	Replace the existing concrete T-bridge on Kamehameha Highway in the vicinity of Hauula.	\$11,000

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OS4	Farrington Highway (Route 93), Bridge Replacement, Makaha Bridges #3 & #3A	Replace two timber bridges in the vicinity of Makaha Beach Park. For both bridges, the scope includes widening the paved shoulders on the makai side from 3 feet to 10 feet; and, widening the mauka side from 1 foot to 10 feet. This is to accommodate bicyclists and pedestrians.	\$0
OS70	Interstate Route H-1, Seismic Retrofit, Waialae Viaduct	Retrofit interchange structures to meet current seismic standards.	\$7,245
OS71	Kamehameha Highway (Route 83), Bridge Rehabilitation, Paumalu Bridge	Rehabilitate the existing bridge on Kamehameha Highway.	\$1,450
OS72	Kamehameha Highway (Route 83), Bridge Replacement, Waimanana Bridge	Replace the existing bridge on Kamehameha Highway.	\$2,370
OS74	Interstate Route H-1, Seismic Retrofit, McCully Street Separation	Retrofit interchange structures to meet current seismic standards.	\$875
OS76	Bridge Rehabilitation Program, Various Locations	This program will fund projects generated from the priorities identified in the Bridge Management System (BRM).	\$4,500
OS77	Bridge Replacement Program, Various Locations	This program will fund projects based on priorities generated from the Bridge Management System (BRM).	\$3,400
OS78	Bridge Seismic Retrofit Program, Various Locations	This program will fund projects based on priorities generated from the Seismic Retrofit program.	\$7,400
OS82	Interstate Route H-1 Improvements, Eastbound, Ola Lane Overpass to Vineyard Boulevard	Eastbound Operational/congestion improvements, and structural improvements to bridges within the limits.	\$65,000
Total			\$274,605

System Performance Targets (PM3)

23 CFR 490 Subparts E, F and G require the OahuMPO in coordination with HDOT to establish performance measures to assess the performance of the interstate system and the performance of the non-Interstate NHS (Level of Travel Time Reliability), to assess the national freight movement on the Interstate System and to assess Congestion Mitigation Air Quality (CMAQ) Traffic Congestion for the purpose of carrying out the CMAQ program. These system performance measures, collectively referred to as the PM-3 measures, include the following:

- Percent of Person-miles traveled on the Interstate System that are reliable
- Percent of Person-miles traveled on the Non-Interstate NHS that are reliable
- Interstate System Truck Travel Time Reliability (TTTR) Index

In November 2018, the OahuMPO Policy Board approved the following system performance targets:

Performance Measure	2018-2020 2-year Target	2018-2022 4-year Target
Percent of Person-miles traveled on the Interstate System that are reliable	70%	74%
Percent of Person-miles traveled on the Non-Interstate NHS that are reliable	N/A	70%
Interstate System Truck Travel Time Reliability (TTTR) Index	2.75	2.75

The following table list the projects and programs that are expected to help achieve the level of travel time reliability targets.

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC1	Alapai Transportation Management Center Operations	Operations and management for the joint communications center behind the Alapai Transit Center which holds City, State & emergency response agencies.	\$1,139
OC10	Traffic Signals at Various Locations	Install and upgrade traffic signals island wide including ADA improvements, signs and markings, and interties.	\$11,879
OC2	Bikeway Improvements Program	This is an ongoing island wide program for the implementation of the Oahu Bicycle Master Plan improvements, the development of new projects, and the upgrade of existing bicycle projects.	\$818
OC-21-54	Kalaeloa Boulevard Railroad Improvements	Design and install a Railroad traffic signal (and traffic camera) located at Kalaeloa Boulevard and Railroad Crossing.	\$805
OC-21-55	Oahu Traffic Signal Controller Modernization, Phase 2	To construct and inspect related equipment for approximately 150 traffic signalized intersections	\$10,696
OC23	Salt Lake Boulevard Widening, Phase 3B	To widen the Salt Lake Boulevard to a multi-lane roadway within the existing 100' right-of-way between Maluna and Ala Lilikoi Streets.	\$32,050
OC25	Transportation Alternatives Set-Aside Program (MPO) at Various Locations	The Transportation Alternatives Set-Aside Program (TA Set-Aside) is a competitive grant program that provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, and community improvement activities. Locations to be determined by the OahuMPO TAP Project Evaluation and Ranking process. HART projects may be flexed from FHWA to FTA. The Ala Wai Bridge project is a new pedestrian and bicycle bridge crossing the Ala Wai Canal in the University Ave/Kalaimoku Street alignment.	\$29,067

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC26	Transportation Alternative Program (State)	The Transportation Alternatives Program (TAP) is a competitive grant program that provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, and community improvement activities. Locations to be determined by the State TAP Project Evaluation and Ranking process. HART projects may be flexed from FHWA to FTA. The Haleiwa Road Multi-Use Path Project will include design, construction, and inspection of improvements, including a multi-use path along Haleiwa Road between Waialua Beach Road and Kamehameha Highway	\$1,892
OC4	Computerized Traffic Control System	Upgrade and expand fiber optic lines, CCTV cameras, data collection, and signal control in urban and rural areas for connection to the Traffic Control Center.	\$1,086
OC8	Traffic Improvements at Various Locations	Provide traffic congestion relief and improve traffic safety at various locations, including but not limited to Mahoe/Waipahu Streets and Manager's Drive/Hiapo Street Intersection.	\$7,919
OS11	ITS Operation and Maintenance	Annual costs to operate and maintain the ongoing and existing ITS program. This includes costs for the operation and maintenance of CCTVs and vehicle detection equipment. This also includes costs for telecommunication and server hosting services.	\$2,000
OS12	Destination Sign, Upgrade and Replacement	Replace and/or upgrade the existing destination signs and sign support structures on Interstate Routes H-1, H-2, H-201, and Pali Highway.	\$35,289
OS17	Interstate Route H-1, Kapolei Interchange Complex, Phase 3	Phase 3 scope of work is widening Farrington Highway, enlarging the H-1 Freeway loop off-ramp to Kalaeloa Blvd, construct the Mauka Frontage Road from Makakilo Drive to Kapolei Interchange, and construct the Palilalai Interchange.	\$47,000
OS-21-44	Pali Highway, Rockfall Mitigation, Vicinity of MP 6.10 to MP 6.55	Rockfall protection/mitigation to be determined following an EA.	\$1,695
OS-21-45	Pali Highway, Rockfall Mitigation, Vicinity of MP 5.90 to MP 6.10	Rockfall protection/mitigation to be determined following an EA.	\$635
OS-21-46	Interstate Route H-1, Kunia Interchange Improvements	Improve capacity and congestion at Kunia Interchange due to the following issues: 1. Bottlenecks at high volume ramps due to merging or diverging of traffic from the mainline to/from the interchange ramp; and 2. A heavy mauka bound right turn movement to the eastbound H-1 on-ramp, as well as a heavy makai bound left-turn movement to the H-1 eastbound on-ramp. Improvements could include widening Ft. Weaver Road between S. Kapuna Loop and Farrington Highway and/or adding/adjusting ramps in the Kunia IC.	\$15,500
OS-21-49	Harbor Access Road (Route 94)	Scope could include but is not limited to the design and construction of new 4 lane divided concrete roadway, auxiliary lanes, sidewalks, bike lanes, traffic signals, intersections, associated utilities, grading, landscaping, and connections to future City roadways and drainage canal bridge crossing.	\$7,000

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OS-21-53	Farrington Highway Widening, Helelua to Mohihi	A 5th lane will be installed on Farrington Highway, from Helelua Street to Mohihi Street. The lane will be used as a turnout lane and as a contraflow lane during peak travel times. Includes reconstructing the roadway and installing signs, striping and pavement markings.	\$32,000
OS-22-60	Adaptive Traffic Signal Control Technology & Traffic Signal Controller Installation at Various Locations, Oahu	The project will install, operate, and maintain new controllers at 268 traffic signal locations on Oahu and implement adaptive traffic control systems (ATCS) at various locations on Oahu. ATCS are a potential method of dealing with congestion, which adjusts signal timing to accommodate changing traffic patterns. Work may include providing and installing hardware, software, vehicle detection, and staff training.	\$41,000
OS-22-62	Farrington Highway (RTE 93) Sidewalk Improvements, Hakimo Rd to Nanakuli Ave, MP 6.89 to MP 5.06	Construct new PCC sidewalk and ramps, drainage facilities, utility relocations and adjustments, driveway adjustments, grade adjustment walls, modifications/adjustments to existing traffic appurtenances (signs, traffic signals, etc.)	\$15,300
OS43	Leeward Bikeway, Philippine Sea Road to Waipahu Depot Street	Improve the bikeway/bike path from Philippine Sea Road to Waipahu Depot Street.	\$0
OS5	Freeway Management System, Interstate H-1, H-2, and Moanalua Freeway (Routes H-201 and 78)	The project consists of the installation of closed-circuit television (CCTV) cameras, vehicle detectors, cabinets, and communication equipment on the Interstate H-1, H-2, and Moanalua Freeway. Minor interior modifications of the Interstate Route H-3 Control Center will also be done to accommodate system improvements. This project will be implemented in phases. The Freeway Management System's System Manager will assist the State with managing and guiding the Intelligent Transportation System (ITS) program. This includes software development, equipment procurement assistance, acceptance testing, performance monitoring, and strategic planning.	\$24,712
OS57	Freeway Management System, Joint Traffic Management Center Operations (State)	These funds will be required for the State share of the annual operating expenses for the JTMC which includes normal building operations and a JTMC Manager. The State share has been calculated based on methodology that involves the estimated square footage that the State will occupy.	\$1,400
OS61	Kamehameha Highway (Route 83) Realignment, Vicinity of Kailua Beach	Realign a portion of Kamehameha Highway, on the North Shore. The project proposes to construct a realignment of Kamehameha Highway, from Haleiwa to the vicinity of Waimea Bay to address safety issues that revolve around use of the beach.	\$1,020
OS63	Traffic Counting Stations at Various Locations, Oahu	Construction of traffic counting stations for traffic data gathering and planning purposes. There is a separate phase shown for the rest of the islands in Statewide section of the STIP. This is a part of phase 2 of the Statewide project. The project will collect required Highway Performance Monitoring System (HPMS) data.	\$2,809

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OS67	Interstate Route H-1, Reconstruction and Repair, Eastbound, Waimalu Interchange to Halawa	Rehabilitate or reconstruct Portland concrete pavement. Widen to improve shoulders and travel way.	\$0
OS75	Kamehameha Highway (Route 83), Rockfall Protection, Waimea Bay	Construct various rockfall/slope protection and slope stabilization mitigation measures.	\$29,326
OS79	Shoreline Protection/Mitigation Program	Develop and construct shoreline protection measures to better protect roadways from flooding and erosion as identified and prioritized in the Statewide Shoreline Protection Program. This funding is for the Oahu District Sub-Program.	\$49,660
OS80	Traffic signal Modernization at Various Locations, Ph2	Upgrade signal equipment to improve programming and optimization, to help improve traffic flow, reduce congestion, and prevent failures & downtime. Upgrades include replace old/damaged signal poles, underground conduits & wiring, signal controllers, and other equipment. Address five high priority intersections.	\$5,000
OS82	Interstate Route H-1 Improvements, Eastbound, Ola Lane Overpass to Vineyard Boulevard	Eastbound Operational/congestion improvements, and structural improvements to bridges within the limits.	\$65,000
OS84	Kamehameha Highway (Route 83) Intersection Improvements at Kahekili Highway	Modify existing intersection and roadway approaches to a roundabout configuration. Improvement also includes a drainage system, curb and gutter, sidewalks, pavement markings and signing.	\$5,900
OS9	Freeway Service Patrol	Operate roving service patrols along the Interstate H-1, Moanalua Freeway, and Interstate H-2. Services include towing of disabled vehicles; removing debris; providing basic fire extinguisher use; deploying traffic control devices; assisting the Honolulu Police Department, Honolulu Fire Department, and Emergency Medical Services at crash scenes and other incidents; assisting sick or injured motorists with basic first aid; and notifying 911 of incidents.	\$16,000
Total			\$495,597

The following table list the projects and programs that are expected to help achieve the truck travel time reliability targets.

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC1	Alapai Transportation Management Center Operations	Operations and management for the joint communications center behind the Alapai Transit Center which holds City, State & emergency response agencies.	\$1,139
OC-21-55	Oahu Traffic Signal Controller Modernization, Phase 2	To construct and inspect related equipment for approximately 150 traffic signalized intersections	\$10,696

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC4	Computerized Traffic Control System	Upgrade and expand fiber optic lines, CCTV cameras, data collection, and signal control in urban and rural areas for connection to the Traffic Control Center.	\$1,086
OS-21-49	Harbor Access Road (Route 94)	Scope could include but is not limited to the design and construction of new 4 lane divided concrete roadway, auxiliary lanes, sidewalks, bike lanes, traffic signals, intersections, associated utilities, grading, landscaping, and connections to future City roadways and drainage canal bridge crossing.	\$7,000
Total			\$19,921

Transit Safety Performance Targets

49 CFR 673 and recipients of Federal assistance under 49 U.S.C. Chapter 53 requires DTS, the operator of the public transportation system on Oahu to establish a Public Transportation Agency Safety Plan and to the maximum extent practicable, coordinate with the OahuMPO to establish the following performance targets based on the safety performance measures established under the National Public Transportation Safety Plan:

- Number of fatalities by mode
- Rate of fatalities per 1M vehicle revenue miles (VRM) by mode
- Number of injuries by mode
- Rate of injuries per 100K VRM by mode
- Number of safety events by mode
- Rate of safety events per 100K VRM by mode
- System reliability (mean distance between major mechanical failures) by mode

In October 2020, the OahuMPO Policy Board approved the following transit safety performance targets:

Transit Mode	Annual Targets						
	Number of fatalities	Rate of fatalities per 1M VRM	Number of injuries	Rate of injuries per 100K VRM	Number of safety events	Rate of safety events per 100K VRM	System reliability (Mean distance between major mechanical failures)
Bus	0	0	109	0.5	122	0.56	10,556
Paratransit	0	0	12	0.155	15	0.196	15,846

The following table list the projects and programs that are expected to help achieve the transit safety targets.

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC21	Transit Safety and Security Projects	Capital improvement projects at various locations will provide safety and security aboard transit vehicles and at future and existing bus stops and transit centers, park-and-ride lots, and bus maintenance facilities.	\$2,177
OS68	State Safety Oversight Program	Provide operational resources for the State Safety Oversight Program administered by the HDOT Rail Transit Safety Office and will Implement 49 CFR Part 674 State Safety Oversight Final Rule.	\$1,796
Total			\$3,973

Transit Asset Management Targets

49 CFR 625 and all recipients of Federal assistance under 49 U.S.C. Chapter 53 requires DTS, the operator of the public transportation system on Oahu to establish a Transit Asset Management (TAM) System to monitor and manage public transportation capital assets to enhance safety, reduce maintenance costs, increase reliability, and improve performance. As a Tier I provider who owns, operates, or manages either one hundred and one or more vehicles or rail transit, DTS is required to develop a TAM Plan and to the maximum extent practicable, coordinate with the OahuMPO to establish targets for three required state of good repair measures:

- Rolling Stock (revenue vehicles)
 - Percentage of revenue vehicles by asset type that have met or exceeded their useful life benchmark (ULB)
- Equipment (non-revenue service vehicles)
 - Percentage of non-revenue service vehicles by asset type that have met or exceeded their ULB
- Facilities
 - Percentage of facilities within an asset group, rated below condition 3 on the Transit Economic Requirements Model (TERM) scale which describes the condition of the asset using a five-category rating system (5 = excellent; 1 = poor)

In October 2020, the OahuMPO Policy Board approved the following transit asset management targets:

Asset Category	Performance Measure	Asset	Annual Target
Rolling Stock	Percentage of revenue vehicles that have met or exceeded their ULB	Articulated Buses	20%
		Buses	20%
		Cutaway Buses	20%
		Vans	20%
Equipment	Percentage of non-revenue service vehicles that have met or exceeded their ULB	Automobiles	25%
		Trucks and other rubber tire vehicles	40%
Facilities	Percentage of facilities rated below condition 3 on the TERM scale	Passenger facilities	10%
		Passenger parking facilities	10%
		Maintenance facilities	10%
		Administrative facilities	10%

The following table list the projects and programs that are expected to help achieve the transit asset management targets.

Project #	Project Name	Project Description	FFY 2022-2025 Total (x1000)
OC13	Bus and Handi-Van Acquisition Program	Purchase replacement transit buses and Handi-Van vehicles.	\$98,199
OC14	Bus Stop ADA Access and Site Improvements	Modify bus stops to comply with the Americans with Disabilities Act (ADA). Improve the mobility independence for transit users of all ages and abilities, pedestrian access, and the number of ADA accessible bus stops.	\$2,583
OC20	Preventive Maintenance	Preventive maintenance of FTA-funded rolling stock (buses and Handi-Vans) includes parts, labor, and other related expenses.	\$78,750
OC31	Middle Street Transit Center	Acquire property located at the Middle Street Transit Center, plan, and design the entire transit campus.	\$2,112
OS50	Transportation Assistance for Elderly and Disabled	Funds from the program will be utilized for the purchase of buses for paratransit services for seniors and individuals with disabilities.	\$2,490
Total			\$184,134

CERTIFICATION

In accordance with 23 CFR 450.336, the OahuMPO shall certify at least every 4 years that the metropolitan transportation planning process is being carried out as required by Federal code and regulation. In addition, the FHWA and the FTA jointly shall review and evaluate the transportation planning process no less than once every 4 years to determine if the process meets the requirements of applicable provisions as required by Federal code and regulation

The self-certification is available in [Appendix E](#).

LIST OF PROJECTS

Projects are identified using an alphanumeric system where the first two letters define the island (“O” for Oahu) and whether it is a State (“S”) or City and County of Honolulu (“C”) project, followed by the project number. Projects submitted after FFY 2021 use a longer format: OC-##-# or OS-##-# with the middle two digits representing the year the project was added to the TIP (e.g., 22 represents FFY 2022) and the last two digits representing the project number. The following tables list the projects and programs grouped by the type of federal funding (e.g., FHWA) and project sponsor (e.g., HDOT).

FHWA Funded Projects: Hawaii Department of Transportation						For Information Only	
Project #	Project Name	FFY 2022 (x1000)	FFY 2023 (x1000)	FFY 2024 (x1000)	FFY 2025 (x1000)	FFY 2026 (x1000)	FFY 2027 (x1000)
OS1	Bridge and Pavement Improvement Program, Oahu	\$21,000	\$21,000	\$21,000	\$21,000	\$21,000	\$21,000
OS4	Farrington Highway (Route 93), Bridge Replacement, Makaha Bridges #3 & #3A	\$0	\$0	\$0	\$0	\$0	\$0
OS5	Freeway Management System, Interstate H-1, H-2, and Moanalua Freeway (Routes H-201 and 78)	\$3,300	\$600	\$10,612	\$10,200	\$0	\$0
OS9	Freeway Service Patrol	\$4,000	\$4,000	\$4,000	\$4,000	\$4,000	\$4,000
OS10	Guardrail and Shoulder Improvements, Various Locations	\$600	\$2,000	\$100	\$2,000	\$100	\$2,000

PROJECT INFORMATION SHEETS

The following project information sheets are grouped by the type of federal funding (e.g., FHWA) and project sponsor (e.g., HDOT) which correspond to the tables in the prior section.

FHWA Funded Projects: Hawaii Department of Transportation

Source: Esri, Maxar, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community

Project Description:

This is an ongoing island wide program for the system maintenance of highway bridges and pavement. Work may include bridge and/or pavement reconstruction, resurfacing, restoration, rehabilitation, and/or preservation.

Mile Post/s: Not applicable

Complete Streets (CS):

Project will implement: No information available. However, CS principles will be considered in all Highway projects.

Existing Feature/s: No information available.

Project Website: None

Neighborhood(s): Various Locations

Estimated Total Project Cost: \$126,000,000

Total Project Cost Notes:

(May include project costs outside of the 4-year TIP and 2 informational years.)

Project Sponsor: State of Hawaii (FHWA Funded)

Agency Responsible for Carrying Out Project/Phase:

Hawaii Department of Transportation

Project Description:
 Replace two timber bridges in the vicinity of Makaha Beach Park. For both bridges, the scope includes widening the paved shoulders on the makai side from 3 feet to 10 feet; and, widening the mauka side from 1 foot to 10 feet. This is to accommodate bicyclists and pedestrians.

Mile Post/s: MP 14.20 to MP 14.10

Complete Streets (CS):
Project will implement: Shared-use paths of 10 feet or greater width

Existing Feature/s: No information available.

Project Website: None

Neighborhood(s): Waianae Coast

Estimated Total Project Cost: \$25,200,000

Total Project Cost Notes:
(May include project costs outside of the 4-year TIP and 2 informational years.)

Project Description:

The project consists of the installation of closed-circuit television (CCTV) cameras, vehicle detectors, cabinets, and communication equipment on the Interstate H-1, H-2, and Moanalua Freeway. Minor interior modifications of the Interstate Route H-3 Control Center will also be done to accommodate system improvements. This project will be implemented in phases.

The Freeway Management System's System Manager will assist the State with managing and guiding the Intelligent Transportation System (ITS) program. This includes software development, equipment procurement assistance, acceptance testing, performance monitoring, and strategic planning.

Mile Post/s: Queen Liliuokalani Freeway: MP 0.00 to MP 27.16, Veterans Memorial Freeway: MP 0.00 to MP 8.33, John A. Burns Freeway: MP 0.00 to MP 15.32

Complete Streets (CS):

Project will implement: No information available. However, CS principles will be considered in all Highway Projects.

Existing Feature/s: No information available.

Project Description:
 Operate roving service patrols along the Interstate H-1, Moanalua Freeway, and Interstate H-2. Services include towing of disabled vehicles; removing debris; providing basic fire extinguisher use; deploying traffic control devices; assisting the Honolulu Police Department, Honolulu Fire Department, and Emergency Medical Services at crash scenes and other incidents; assisting sick or injured motorists with basic first aid; and notifying 911 of incidents.

Mile Post/s:
 Queen Liliuokalani Freeway: MP 5.37 to MP 27.16, Veterans Memorial Freeway: MP 0.00 to MP 2.46, Moanalua Freeway: MP 0.00 to MP 4.09

Complete Streets (CS):
 Project will implement: Not applicable

 Existing Feature/s: Not applicable

Project Website: <http://www.fsphawaii.com>

Neighborhood(s): Various Locations

Estimated Total Project Cost: \$26,500,000

Total Project Cost Notes:
(May include project costs outside of the 4-year TIP and 2 informational years.)

Project Sponsor: State of Hawaii (FHWA Funded)

Agency Responsible for Carrying Out Project/Phase:
 Hawaii Department of Transportation

OS14 Interstate Route H-1, Guardrail and Shoulder Improvements, Kapiolani Interchange to Ainakoa Avenue, Phase 2

Source: Esri, Maxar, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community, Sources: Esri, HERE, Garmin, FAO, NOAA, USGS, © OpenStreetMap contributors, and the GIS User Community

Project Description:

Install and/or upgrade existing guardrails, crash cushions, and concrete barriers to meet current standards. Upgrade lighting.

On Westbound Kalanianaʻole Highway, just before the Ainakoa Intersection, the shoulder and bike lane tapers off until it disappears at Ainakoa. To the west on H-1, and on the off-ramp to below the viaduct towards Kahala Mall, a shoulder and bike lane reappears. The project will close that gap in the bike lane, by taking space from the median on H-1.

Mile Post/s: MP 25.24 to MP 27.16

Complete Streets (CS):

Project will implement: Close gap in bike lane.

Existing Feature/s: No information available.

Project Description:

Upgrade signal equipment to improve programming and optimization, to help improve traffic flow, reduce congestion, and prevent failures & downtime. Upgrades include replace old/damaged signal poles, underground conduits & wiring, signal controllers, and other equipment. Address five high priority intersections.

Mile Post/s:

Complete Streets (CS):

Project will implement: No information available. However, CS principles will be considered in all Highway Projects.

Existing Feature/s: No information available.

OS-21-46 Interstate Route H-1, Kunia Interchange Improvements

Source: Esri, Maxar, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community, Sources: Esri, HERE, Garmin, FAO, NOAA, USGS, © OpenStreetMap contributors, and the GIS User Community

Project Description:

Improve capacity and congestion at Kunia Interchange due to the following issues: 1. Bottlenecks at high volume ramps due to merging or diverging of traffic from the mainline to/from the interchange ramp; and 2. A heavy mauka bound right turn movement to the eastbound H-1 on-ramp, as well as a heavy makai bound left-turn movement to the H-1 eastbound on-ramp. Improvements could include widening Ft. Weaver Road between S. Kapuna Loop and Farrington Highway and/or adding/adjusting ramps in the Kunia IC.

Mile Post/s: MP 5.0 - 6.0 (Route H1) and MP 6.0-6.5 (Route 76)

Complete Streets (CS):

Project will implement: There will be separate facilities for pedestrians and bicyclist traveling on the Kunia Road segment of the interchange.

Existing Feature/s: No information available

Project Website: None

Neighborhood(s): Waipahu, Ewa

Estimated Total Project Cost: \$160,000,000

Total Project Cost Notes:

(May include project costs outside of the 4-year TIP and 2 informational years.)

Source: Esri, Maxar, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community

Project Description:

The project will install, operate, and maintain new controllers at 268 traffic signal locations on Oahu and implement adaptive traffic control systems (ATCS) at various locations on Oahu. ATCS are a potential method of dealing with congestion, which adjusts signal timing to accommodate changing traffic patterns. Work may include providing and installing hardware, software, vehicle detection, and staff training.

OS-22-62 Farrington Highway (RTE 93) Sidewalk Improvements, Hakimo Rd to Nanakuli Ave, MP 6.89 to MP 5.06

Source: Esri, Maxar, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community, Sources: Esri, HERE, Garmin, FAO, NOAA, USGS, © OpenStreetMap contributors, and the GIS User Community

Project Description:

Construct new PCC sidewalk and ramps, drainage facilities, utility relocations and adjustments, driveway adjustments, grade adjustment walls, modifications/adjustments to existing traffic appurtenances (signs, traffic signals, etc.)

Mile Post/s: 6.89 to 5.06

Complete Streets (CS):

Project will implement: The purpose of the project is to improve pedestrian safety, accessibility, and mobility with the implementation of improvements in an "area of concern" identified in the Statewide Pedestrian Master Plan. There is a need to improve pedestrian facilities for safety, accessibility, and multimodal connectivity. The project will construct new PCC sidewalk and ramps, drainage facilities, utility relocations and adjustments, driveway adjustments, grade adjustment walls, modifications/adjustments to existing traffic appurtenances (signs, traffic signals, etc.)

Existing Feature/s:

Existing utilities may need to be adjusted and/or relocated to accommodate the new sidewalk alignment and/or elevation.

OS-22-64 Whitmore Ave (RTE 7012) Sidewalk Improvements, Phase 2, Ihiihi Ave to Whitmore Community Center, MP 0.72 to MP 1.04

Source: Esri, Maxar, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community, Sources: Esri, HERE, Garmin, FAO, NOAA, USGS, © OpenStreetMap contributors, and the GIS User Community

Project Description:

Construct new PCC sidewalk and ramps, drainage facilities, utility relocations and adjustments, driveway adjustments.

Mile Post/s:

Complete Streets (CS):

Project will implement: The purpose of the project is to improve pedestrian safety, accessibility, and mobility by replacing older existing asphalt path (i.e., roadway shoulder) with a new concrete sidewalk. There is a need to improve pedestrian facilities for safety, accessibility, and multimodal connectivity. The project will construct new PCC sidewalk and ramps, drainage facilities, utility relocations and adjustments, driveway adjustments.

Existing Feature/s: Existing utilities may need to be adjusted and/or relocated to accommodate the new sidewalk alignment and/or elevation.

Project Website: None

Neighborhood(s): Wahiawa

Estimated Total Project Cost: \$3,100,000

Total Project Cost Notes:

(May include project costs outside of the 4-year TIP and 2 informational years.)

Project Sponsor: State of Hawaii (FHWA Funded)

Agency Responsible for Carrying Out Project/Phase:

Hawaii Department of Transportation

Project Description:

The Transportation Alternatives Set-Aside Program (TA Set-Aside) is a competitive grant program that provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, and community improvement activities. Locations to be determined by the OahuMPO TAP Project Evaluation and Ranking process. HART projects may be flexed from FHWA to FTA. The Ala Wai Bridge project is a new pedestrian and bicycle bridge crossing the Ala Wai Canal in the University Ave/Kalaimoku Street alignment.

Mile Post/s:

Complete Streets (CS):

Project will implement: Ala Wai Bridge will be a new pedestrian and bicycle bridge crossing the Ala Wai Canal, connecting Waikiki and McCully-Moiliili neighborhoods.

Existing Feature/s: No information available.

Project Website: <https://www.oahumpo.org/plans-and-programs/transportation-alternatives-ta-set-aside/>

Neighborhood(s): McCully-Moiliili, Various Locations

Estimated Total Project Cost: \$46,600,000

Total Project Cost Notes:

(May include project costs outside of the 4-year TIP and 2 informational years.)

Project Sponsor: City and County of Honolulu

Agency Responsible for Carrying Out Project/Phase:

City Department of Transportation Services

Project Description:

The Transportation Alternatives Program (TAP) is a competitive grant program that provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, and community improvement activities. Locations to be determined by the State TAP Project Evaluation and Ranking process. HART projects may be flexed from FHWA to FTA. The Haleiwa Road Multi-Use Path Project will include design, construction, and inspection of improvements, including a multi-use path along Haleiwa Road between Waialua Beach Road and

OC-21-59 Intermodal Connectivity TA Set-Aside (OahuMPO)

Source: Esri, Maxar, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community, Sources: Esri, HERE, Garmin, FAO, NOAA, USGS, © OpenStreetMap contributors, and the GIS User Community

Project Description:

This program encompasses projects that have been awarded OahuMPO Transportation Set-Aside funds (TA Set-Aside) and have been flexed from FHWA to FTA. The TA Set-Aside is a competitive grant program that provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, and community improvement activities. Locations to be determined by the OahuMPO TA Project Evaluation and Ranking process.

Mile Post/s:

Complete Streets (CS):

Project will implement: Project will incorporate complete streets features for pedestrian and bicycle use.

Existing Feature/s:
